

REF : Professional Property Maintenance Services Ltd

As an Interior Designer I have worked with Professional Property Maintenance Services for more than 15 years on a variety of projects – some commercially time sensitive, others residential including protected structures.

Their attention to detail is superb & their experience is multi-faceted. They worked with me primarily as painters but have also supplied other subcontractors to carry out renovations, plumbing and electrical work.

Several of my repeat clients of mine will specifically request them for their next project as they value the quality of their work.

Their work is excellent & neatly carried out, they are very respectful of the premises they are working in which clients greatly appreciate.

I particularly love their can-do attitude in the face of a challenge, nothing is ever a problem.

I have absolutely no hesitation in recommending them for any project.
